"Into the Future with Tea"

**Kawasaki Kiko Co., Ltd.**

# FEATURE

## Flow of Manufacturing Oolong Tea

- Chamber withering and cool-down and tossing&shaking which are important for oolong tea manufacturing, are processed.
- The capacity is 50-80 kg per batch, it will wither for about 8 to 16 hours.
- Temperature • rotation • rotation time • interval etc. are set in multiple stages, it is automatically controlled so it is possible to make tea for a wide range of varieties (wilting incense green tea~oolong tea~black tea) according to the application.
- Weighing sensor makes easier to understand the degree of withering (weight loss) at a glance. (optional)

## SPECIFICATION

Model	Dimension (mm)			Capacity (kg/batch)	Motor power (kW)		Optional
	Width	Depth	Height		Air Conditioning Power (kW)		
WL60K-MI	3,925	1,690	1,810	50 ~ 80	0.2		Weighing load cell
	Barrel Dimension (mm)				Air Conditioning Power (kW)		
	Diameter (Inside)		Length (Inside)		Cool air	Warm air	
	1,100		3,000		1	5.5	
	Chamber Dimension (mm)						
	Width	Depth	Height				
430	420	1,050					

This machine was developed in collaboration with Kawasaki kiko., Ltd. and Miyazaki prefecture in Japan.

\* Note that specifications and appearance are subject to change without notice in order to improve the machine.
